CoActiveSoft Launches Its Business Center

Living up to its mission of providing solutions to service providers, CoActiveSoft announces the launch of the CoActiveSoft Business Center. The premise behind CoActiveSoft's latest department is that many small home service providers have a need to outsource routine business processes, such as invoicing, payroll, IT support, etc. Instead of getting bogged down with tasks that are not their core competence, by outsourcing some of these tasks to CoActiveSoft, these home service providers can focus on their mission which will lead to greater customer satisfaction and, ultimately, a more successful business.

“Providing superior software is at the core of our mission, but we also realize that the best software provides only limited benefit if a company doesn't have a business infrastructure in place. We help with both”

*- Ryan Olmstead, Co-founder

Divine Home Health Signs Agreement with CoActiveSoft

Divine Home Health, a Renton-based home care company, joined the CoActiveSoft family and licenses Proiaso, its flagship Home Service Management and Planning (HSMP) product. “We are very pleased to welcome Divine Home Health as our latest customer,” says Wolfgang Stoeckl, one of the co-founders of CoActiveSoft. “Since we launched Proiaso, we have been able to sign clients at a pretty steady pace which validates our business model and product strategy.” Besides home health care companies, CoActiveSoft has also signed customers in the home cleaning industry. Thanks to its user-centric design and its comprehensive feature set, Proiaso provides superior value to any home service provider.
